Better Chrysanthemums

for

1935

We have been extensive growers of this crop for wholesale markets for 30 years. In reply to frequent inquiries received for rooted cuttings, we have arranged to have our entire stock propagated for us at Barberton, Ohio, by specialists whose facilities for carrying on the propagating and shipping of these cuttings is most complete and efficient. This change is made in the interest of our well-known policy, — the best possible stock, regardless. We, accordingly, guarantee every cutting ordered from us to be well rooted and of the highest quality in size, vigor, and freedom of any insects or disease. They are, furthermore, packed in the most approved way and are guaranteed to reach you in perfect shape in any part of the United States.

If your stock is infected with midge or run down, we feel certain that it will be profitably replaced by the stock we are offering. Also, unless you are a specialist or propagate in a large way, the chances are you can not propagate such stock as we are offering at \$20.00 or \$25.00 per 1000.

ORDER EARLY. While our stock is large in most varieties, shortages do occur, especially late in the season. Order early, — at once. Nothing gained by delay.

DISCOUNT. For cash with order for mum cuttings we allow a discount of 8%. Under present conditions it is very good business to order what you can pay cash for.

SHADING MUMS. On page 2 will be found suggestions on shading mums. We will gladly hear from you if we can be of further service along these lines.

Geo. J. Ball, Inc., West Chicago, Ill.

"Enclose Your Mum With Your Seed Order"

Shading for Early Flowering

Mums are normally induced to set buds in the fall by reason of the shortening days. By lengthening the days with electric lights the formation of buds and flowering is deferred, and this is sometimes taken advantage of when a certain variety is wanted for a later date. But it is thru shortening the days artificially, inducing setting of buds and early flowering, that real and substantial value is being added to the mum crop. The value of getting October kind in September, and November varieties in October can easily be imagined. But there are a few points to watch in this rather unnatural procedure. One is to plant early, not later than May 15th in our latitude. If this is not done, the early setting of buds will leave them on short stems. It is important to remember this, for it explains much short stemmed early stock. The large standards should be at least 16-18 in. high before shading starts, for they do not draw up much more than 8-10 in. after that. Also, it is important, in growing mums for any purpose, but particularly for early forcing, not to permit the young stock to become checked or hardened, especially in the early stage. Practically all varieties are equally suitable for early flowering thru shade; but when pink and bronze kind are flowered early in September or during warm weather, the color is somewhat affected, while white and yellow come perfect. Late September all colors come well in our latitude. A few shading dates and varieties we used the past season might be of interest.

VARIETIES	SHADE STARTED	SHADE REMOVED	IN FULL CROP
Silversheen	August 1	August 20	September 25
Citronella	August 1	August 20	October 5
Norma	August 1	August 25	October 10
Silver Ball	August 1	August 25	September 25
Irene	August 1	August 25	September 25
Adelaide	August 1	August 25	September 25
Pink Dot	August 1	August 25	October 3
Dream	August 1	August 25	October 6
Nuggets	August 1	August 25	September 25
Source d' Or	August 1	August 25	October 7
Gold Lode	August 1	August 20	September 12
Friendly Rival	August 1	August 20	October 8

Following are results of season '33 and might be of further interest.

VARIETIES	SHADE STARTED	SHADE REMOVED	IN FULL CROP
Ambassador	July 15	August 8	September 10
Quaker Maid	July 15	August 8	September 10
Celestra	July 15	August 8	September 12
Norma	August 22	September 9	October 20
Citronella	July 15	August 8	September 10

Mrs. Wilcox (Beu)	September 10	October 7	November 10
Source d' Or	August 22	September 9	October 20

"Enclose Your Mum With Your Seed Order"

We wish to point out particularly that August 1st is an advantageous date to start the shade in more ways than one. Note that the use of the cloth for this starting date is finished August 20-25. Also that excellent results were had starting shade on other lots after setting buds on the first and as late as September 10th. This suggests use of the same cloth for two crops in a season. Next year our earliest shading date will be July 20th on stock grown in open or sash houses. Cloth used on this will be easily and advantageously used on a later lot.

For our latitude we would not recommend shading before July 20th, for the flowers are in limited demand earlier than mid-September. Also, the occasional early September hot spells we are subject to frequently cause loss thru spotting of the large flowers. Pompons are safer for early shading. Difference will be found in hardness of large varieties. We find Ambassador spots easily in high temperatures, and shouldn't be in the first early shading. The old Uvalda was, or is, very soft. Silver Sheen we find an excellent white for forcing.

The most satisfactory cloth for shading is black sateen, tho any material will do that produces a fair degree of darkness. We find that if promptly put away when finished and stored dry and clean, the sateen cloth is good for 3 years, tho not so efficient the third.

Most every grower's method of adjusting the cloth over the bed differs in detail. The only arbitrary point is that there must be no openings to permit light to enter. Usually the cloth is supported by wires stretched over the bed 8-10 in. apart and unrolled over the wire from a round pole. For the sides, one edge of the cloth is fitted with rings with which the cloth hangs from the top wire and is adjusted as wanted. The cloth is pulled in place for darkening at 6:00 o'clock in the evening and left on until 7:00 o'clock the following morning.

In conclusion, remember that the demand for mums is limited thru most of September, especially early in the month, because of much summer stock; so don't overdo the mums at this season.

Large Orders

Have you ever figured the cost of producing mum cuttings, — the space used for stock plants, the continual fight to keep them clean, cuttings lost in the sand and sometimes loss in not having the stock when wanted.

The production of mum cuttings is a specialized business and it is done more economically and better by the specialist.

If you are interested in large lots of mum cuttings and can place your order in January, we are in a position to quote closer prices.

"Enclose Your Mum With Your Seed Order"

Please Note

We recommend ordering no less than twenty-five of a variety. Where fewer are ordered, charges will be made at the rate per ten.

Below are listed the rates per hundred of our several classes, and opposite each rate is indicated the corresponding rate per ten:

Rate per 100	Rate per 10
\$ 3.00	\$.50
4.00	.50
5.00	1.00
6.00	1.00
8.00	1.50
10.00	1.50
12.00	2.00

Also: In this catalog we have duplications of names appearing as follows:

GLADYS PEARSON — Original Stock

GLADYS PEARSON (Dark Bronze) — A dark bronze selection of Gladys Pearson.

INNOCENCE — A hardy variety listed under Hardies.

SMITH'S INNOCENCE — A white anemone flowered variety listed under Anemones.

YELLOW DOT — A small yellow pompon variety.

YELLOW DOT (Jablonsky) — A yellow sport of Pink Dot.

GRENADIER — A red Pompon variety.

GRENADIER (Hardy) — A hardy variety listed among the Hardies.

When ordering any of these varieties, please specify clearly which is intended.

"Enclose Your Mum With Your Seed Order"

The Outstanding Novelties for 1935

PRINCETON (De Petris)

A wonderful large pompon with good stem and excellent spray formation. Its color is a beautiful deep golden yellow suffused with orange. It matures around the middle of November and is a great improvement upon existing varieties of its type.

This variety was awarded the A. C. S. Silver Cup for the best seedling pompon for 1934.

We can recommend this new pompon as the best pompon of its type to date, and one that is certain to become popular.

VALENCIA (De Petris)

Single varieties are increasing in popularity, and we consider this variety the best single in existence.

It possesses a strong and vigorous habit of growth. It is very productive and has great substance. It forms strong, well formed sprays and requires no disbudding. It is late, maturing the end of November.

In color it is a beautiful shade of orchid pink, which appeals to all who see it.

This variety is certain to become one of the most popular wherever grown and we recommend it very highly both as a good seller and a money maker.

We are very sure that no mum grower can afford to be without the above two. To assure the filling of your order for them, mail it today.

CAMPFIRE (De Petris)

A red spray pompon which grows somewhat tall but is very productive and an improvement upon present day varieties of this color. Matures about November 20th.

SUNNY BOY (De Petris)

A single yellow somewhat like Valencia but having fewer petals. Its habit of growth is ideal although it does not equal Valencia in the type of flower. Requires no disbudding and matures about November 15th.

GOOD NEWS

A golden yellow sport of Detroit News and like it in every respect excepting color.

The excellent substance and keeping qualities of Detroit News exist in this variety. We believe it to be the best of its season and color.

All of the five⁷ above mentioned varieties:

\$12.00 per 100 \$100.00 per 1000
